We really need better
dashboards

@jstanier

[9:00] how's it going?
[10:14] how's progress?
[11:31] all ok? can i help?
[11:51] i've sent you a draft
[12:43] can i have a check in?
[15:03] i've added some more to it
[16:43] can we have a Zoom please?
...

What we'll cover

- **What** delegation is and **how** to do it
- How **individual contributors** can delegate too
- How to deal with losing **control**

Hello

Scrum in Space

Mars Landing!

QUICK FILTERS: [Only My Issues](#) [Recently Updated](#)

TO DO

- TIS-10
Complete ignition tests

Saturn Shoot

✓ =
- TIS-15
Get Hubble working again

Space Exploration

📌 = 0
- TIS-16
Research the Space Exploration project

Space Exploration

📌 = 0
- TIS-17
Design a new rocket

Space Exploration

📌 = 0
- TIS-6
Hire the team

📌 = 5

IN PROGRESS

- TIS-1
Spaceship tracker app updates

Mars Landing

✓ =
- TIS-2
Verify the landing site

Mars Landing

✓ =

DONE

- TIS-3
Enter the landing trajectory into the landing module

Mars Landing

📌 = 1
- TIS-4
Send the pre-landing report to Earth

Mars Landing

📌 = 1
- TIS-5
Cleanup the landing site

Mars Landing

📌 = 2

Delegation

Delegation is the **transfer of responsibility for a task** from you to another person.

But what does that mean?

Accountability and responsibility

- Accountability means being **held to account** for the completion and quality.
- **Responsibility** means you are actually doing it.

Delegation is the **transfer of responsibility for a task** from you to another person.

You remain **accountable.**

[10:14] how's progress?
[11:31] all ok?
[12:43] can i have a check in?
[15:03] is there a PR to look at?
[16:43] can we have a Zoom please?
...

Delegation

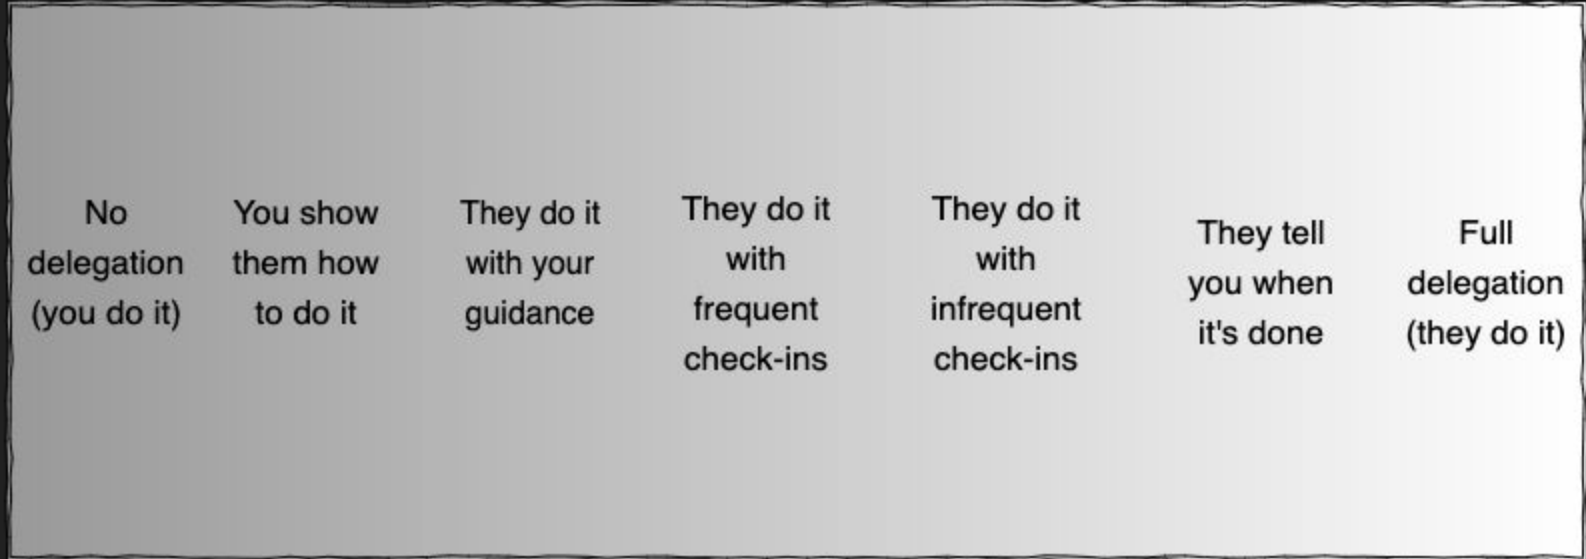

Control

You delegate **tasks to people** along the continuum.

You don't just delegate **to people**.

Delegation

Control

Delegation: do

- **Delegate**
- Delegate to **challenge**
- Retain **just enough control**

Delegation: don't

- **Abdicate**
- Assume people **work the same way as you**
- **Steal back control**

From the office to the school

@jstanier

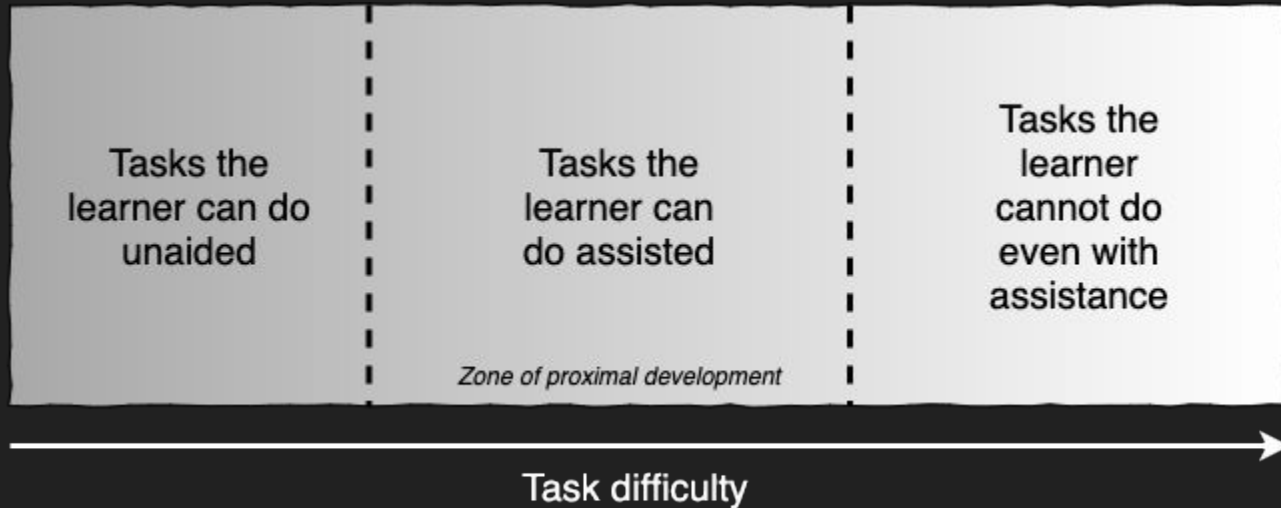

The diagram consists of three concentric circles on a black background. The outermost circle is light gray and contains the text 'What the student does not know'. The middle circle is a medium gray and contains the text 'What the student can learn with guidance' followed by '(Zone of proximal development)'. The innermost circle is the darkest gray and contains the text 'What the student already knows'.

**What the student
does not know**

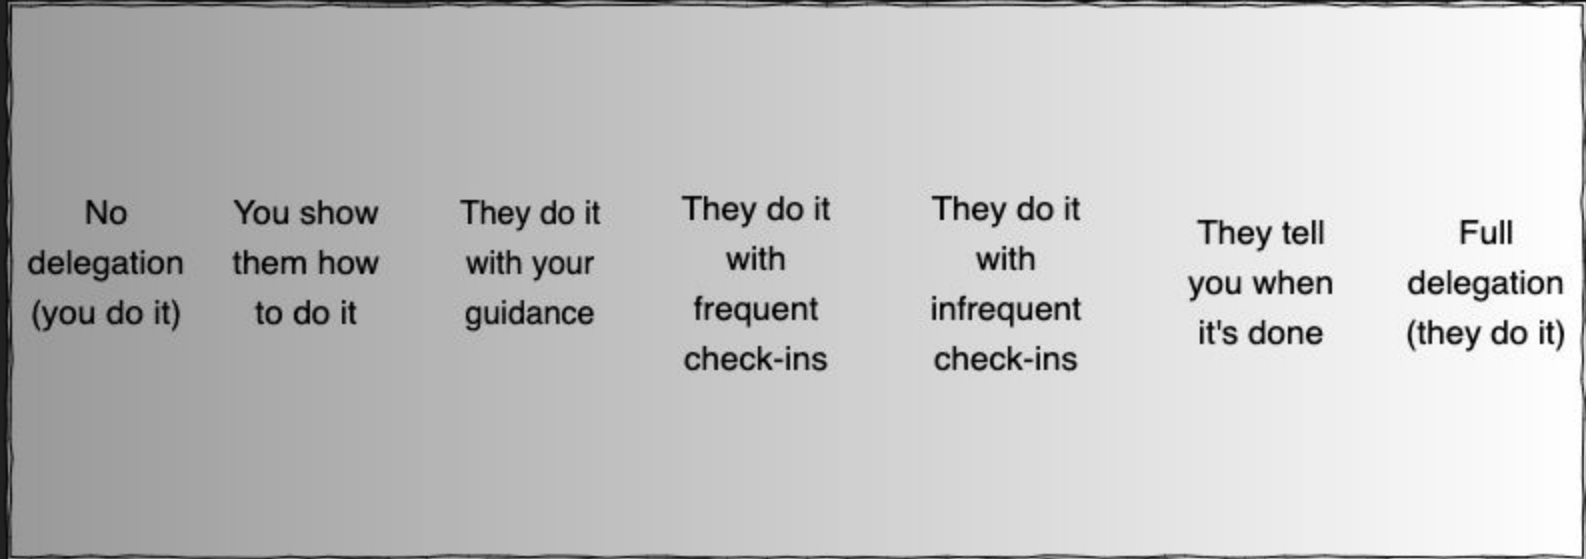

**What the student can
learn with guidance**
(Zone of proximal development)

**What the
student already
knows**

Does this look familiar?

Delegation

Control

Delegation as learning

- Each task is a chance for **learning and mentorship**
- Delegate a task, assign a **mentor**
- This means **ICs can delegate too!**

Letting go of control

Good delegation means...

- Increased **team output**
- Increased **experience and skill**
- **You can do more!**

So it also means...

- Reduced **control**
- Increased **worry, stress, anxiety, and more**

@jstanier

Some things are up to us, and some things are not up to us.

— Epictetus (paraphrased)

Dichotomy of control

Things you have control over: **worry about the outcome.**

Things you have no control over: **don't worry about the outcome.**

But wait!

@jstanier

Trichotomy of control

Things you have control over: **worry about the outcome.**

Things you have no control over: **don't worry about the outcome.**

Things you have *some* control over: **set internal goals and try your best.**

— William Irvine

Control: do

- Be comfortable being uncomfortable.
- Delegate.
- Exercise *some* control.
- Try your best.

Control: don't

- Worry unnecessarily.
- Hoard tasks.
- Steal control back.
- Fire and forget.

Your default workload

Flex for planning,
emergencies,
interruptions, and people
that need you

← Total capacity →

What we've learned

- Delegation
- The Zone of Proximal Development
- The trichotomy of control
- That *you too* can be a master delegator.
