

# Shopify's architecture to handle the world's biggest flash sales

Bart de Water

QCon London - April 4, 2022

## Introduction

- Bart de Water
- Manager @ Shopify Payments
-   
- <https://twitter.com/bdewater>

MAKE  
COMMERCE  
BETTER FOR  
EVERYONE

A large, illuminated neon sign is mounted on a brick wall. The sign is shaped like a diamond with arrowheads on the left and right sides. The text "MAKE COMMERCE BETTER FOR EVERYONE" is written in a bold, sans-serif font, with each letter filled with small, glowing lights. The sign is mounted on a dark brick wall, and a power cord is visible on the left side.

**Shopify handles  
some of the largest  
flash sales in the  
world**

+ MySQL + Redis + memcached

React (Native) + GraphQL

40

deploys per day

Working fully remote

## Load testing setup

		Expected User Experience		
		User can browse	User can check out	User is served from a passive region
Possible Failures	MySQL (persistent storage dependency)			
	Down	Yes	No	Yes
	Slow	Yes	Yes	Yes
	Shipify (third party application dependency)			
	All providers down	Yes	No	Sometimes
	One provider down	Yes	Yes, except ...	Yes
	Regional (network architecture)			
	Network partition	Yes	Yes	Yes, if ...
	Routing mistake	Yes	No	Yes

## Circuit breaker

## Circuit breaker

```
Toxiproxy[:mysql].downstream(:timeout, timeout: 1000).apply do  
  assert(Database.unhealthy?)  
end
```

```
Toxiproxy[:redis].down do  
  user.get_session  
end
```

<https://github.com/Shopify/toxiproxy>

```
SEMIAN_DEFAULTS = { success_threshold: 1,  
                    error_threshold: 3,  
                    error_timeout: 10 }
```

```
Semian::NetHTTP.semian_configuration = -> do |host, port|  
  SEMIAN_DEFAULTS.merge(name: "#{host}_#{port}")  
end
```

## Idempotent request

```
